### **DETAILED ACTION**

Applicants' arguments, filed 9/25/06, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Several citations are lined through on the enclosed PTO form 1449 due to lacking a date of publication as required for such citations.

### **OBVIOUSNESS REJECTIONS**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-5, and 10-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 88/08708.

This rejection is maintained and reiterated from the previous office action, mailed 4/20/06. Applicant argues that the reference lacks a description of an activity delay during which there is no activity to distinguish the instant claims over the reference. In response consideration of the above instant claims reveals that there is no limitation therein of any period of "no activity". Rather only a delay of activity is cited which has also been cited as being in the reference as described in said previous office action via

it sustained release description. This argument therefore is not consistent with the instant claims and therefore non-persuasive.

Claims 1, 3-5, 10-19, 21, 24-26, 29-37, and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 88/08708 in view of Moormann (P/N 5,643,905).

This rejection is maintained and reiterated from the previous office action, mailed 4/20/06. Applicant argues that Moormann et al. does not contemplate "zero release" for any period. In response, none of the above instant claims as rejected require "zero release" for any period, but rather only delayed release which is also described in the references and thus this argument is non-persuasive as not being consistent with the instant claim limitations.

### **CLAIM OBJECTIONS**

Claims 20 and 38-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1614

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
